

*** CANFIELD ***

***OBJECTIVE:** Build the foundation cards into complete suits of thirteen cards, in any sequence.

***Play Instructions:**

1) SET UP. Deal a stockpile of thirteen face-down cards, with the last one turned up. Deal four cards face-up in layout to the right of this pile. Deal one face-up card above them. That specific card, i.e. 8 of Diamonds (as seen in picture), becomes the rank used to begin the other three foundations. As other cards of the same rank appear, place them in a foundation.

2) FOUNDATIONS. For the foundations and stock & discard piles, place 6 small wire baskets as seen in picture.

3) MOVING. Play the cards from the 4 card layout on the foundations in any sequence, same suit. The layout cards should be played in a “descending” sequence in alternate colors. The discard pile’s top card can be played in either place. If a card is removed from the 4 layout cards, then the top card from the stockpile replaces it. You can then turn the cards over in batches of Three, with the top card always available to play. Remaining cards should be placed in the discard pile face-up, with the top card available to play. When your stockpile of cards runs out, shuffle the discard pile at which point it becomes the new stockpile. Re-deal with this stockpile and repeat until unable to play.

4) WINNING. Build the foundation cards into complete suits of thirteen cards in any sequence.

VARIATIONS To make easier: A) Place same rank cards in the foundations before the game & build in any sequence, with the same suit.
